SHARPGRADE®
Setting the Grade

Transform your skidsteer loader into a precision grader blade

Simple, reliable 2D control system for SharpGrade products with IP67 screen & Junction Box. Operates with fixed height, adjustable grade height & Sonic tracker / slope sensor options. Provides precision grading in a very rugged format, without the complexity of conventional designs. Plug & play design, minimal wiring, easy to install, auto tune function does not require a machine control technician.

- Simple, easy to use layout; ideal for first time users
- Adjustable offsets directly from screen; quick, easy grade adjustment
- Direct Connect: Seamlessly integrates into most skid steer joysticks
- Auto/manual function off screen or joysticks: no extra switches
- Auto sensor recognition: no need to search & calibrate
- Electric wheel retract option off screen

WHY QUADGRADE?

- Designed for first time users
- Simple to calibrate by any technician
- Auto sensor recognition
- Sonic & slope compatible
- Plug & play harness
- Simple Direct Connect integration from 14 pin plug on boom
